

Rajarsh Gangwar

Computer Science and Engineer

I am seeking a position that will allow me to use the skills and strengths I acquired as a student. I have worked on several projects. I work extremely well in a team environment and have been a team leader on several of my projects. I am prepared to make a significant contribution in the next step in my career.

PERSONAL PROJECTS

Tourist Website (07/2021 - 08/2021)

- I have designed this website using Angular, HTML and CSS programming language. In this website I have used parallax background image and in this website a traveler can search for the place where he or she want to go.

Music Store Page (09/2021 - 11/2021)

- I have designed this website using HTML and CSS. In this website we can search for the music list and music instruments.

Task Management System (12/2021 - 01/2022)

- This project is used to fetch data from backend server and user can create, update and delete the data. I have designed this by using Angular, HTML and CSS and bootstrap programming language.

Online Job Portal System (12/2020 - 04/2021)

- This is a project based on Python, HTML & CSS programming language and framework used in this project is Django. In this project job seeker can easily search jobs according to their qualifications and skills.

E-Commerce Cart (12/2021 - 01/2022)

- This is a project based on Angular framework. In this project user can easily search products according to their needs and then add it to the cart.
